1. Welcome from Maddalena Illario, RSCN chair, and Alina Lupu, DG CNCT

2. The RSCN today, John Farrell

3. Shared approach & purpose, Maddalena Illario

4. Focusing on TWG: interactive conversation and proposals for coordination teams. Vincenzo De Luca and all participants.

5. Setting the ground for the Action Plan 2023-2026 & upcoming activities. Maddalena Illario & John Farrell
Pan European Network established in 2013 as a bottom up initiative by AHA Reference Sites

Represents all accredited Active and Healthy Ageing/Living Reference Site regions.

Promotes and Facilitates the implementation and Scaling-Up of Innovation and Digital Solutions to address the life-course approach to active and healthy ageing

Facilitates multidisciplinary experts from public authorities, health, social care, education, business, research, policy, patient and citizen groups, and communities to identify and address mutual health and care challenges that will lead to sustainable improvements in health and care outcomes for citizens throughout the life-course.

Supports AHA Reference Sites in Europe, and beyond, to:

- Promote all active and healthy ageing/living actions within a “whole life course”
- Accelerate the deployment of major innovations which will improve health, wellbeing, and care outcomes,
- Develop new business models for innovative services
- Facilitate economic growth opportunities through new skills and new jobs in health, well-being, and social care
RSCN Aims

a) **Promote** a life-course approach applied to specific targets and settings

b) **Accelerate** the scaling-up and deployment of major innovations and digital health and care solutions that are tailored to our RS

By bringing together all accredited AHA Reference Sites into a single network we:

- facilitate the sharing of knowledge and expertise;
- create opportunities for collaboration to address common health and care challenges;
- facilitate AHA Reference Site regions in the development and implementation of regional health and care transformation programmes;
- generate connections with European and International forums to promote a life-course approach to active and healthy ageing.
Focussed on Quality

- Applications have to demonstrate:
  - a record of evidence-based change in addressing a life-course approach to active and healthy ageing
  - future plans for transformation of health and care to meet regional, national and European priorities
  - scaling-up and transferability of solutions

- Continued adoption of the Quadruple Helix Model;

- Addressing current and emerging health and care challenges at regional, national and European levels

- Commitment of the 66 AHA(L) Reference Site regions to collaborate & generate impact
Network Coverage

66 Accredited AHA Reference Site Regions

- 250m Citizens
- 1,400 public authorities, hospitals, primary and community care providers, social care providers
- 1,800 SMEs and Start Ups
- 500 Universities, Colleges and research centres
- 500 patient, voluntary, and community groups
RSCN Outreach

Nigeria, Ethiopia, Malawi, Uganda, Kenya

ARUA
African Research Universities Alliance

Cape Winelands Biosphere Reserve, South Africa

Carribean Barbados

RSCN European AHA REFERENCE SITES
Services for AHA Reference Sites

INFORMING
Providing access to the latest information on health and care, active and healthy ageing, digital health including alerts to funding opportunities

SUPPORTING
Support knowledge sharing on evidence-based good practice approaches, Innovation, and digital health solutions

PROMOTING
Connection with and between policy makers, health and care providers, researchers, and business leaders

INSPIRE
inspire the development of local networks and build opportunities for collaboration on projects with other members

RESEARCH
Support the design of person-centered innovative solutions for lifecourse AHA
Collaborative activities

Thematic Working Groups
- Identify and address research gaps
- Assess and evaluate good practices and case studies
- Support regions and organisations to adapt and adopt innovative solutions
- Spread knowledge and skills

Expert Panel
- Supporting TWG, projects & Ex Board

Executive Board
- Drive forward strategies, planning & implementation

Sharing Knowledge and Good Practice
- Webinars
- Workshops
- Twinnings
- Documents & Papers
Our Approach to Innovation

MULTIDIMENSIONAL INTERVENTIONS FOR LIFE-COURSE HEALTH AND WELLBEING

MULTIDIMENSIONAL INTERVENTIONS FOR LIFE-COURSE HEALTH AND WELLBEING
Twinning Opportunities

Bridging the Gap for Scaling-Up Innovation

EU Priority areas for the transformation of health and care in the Digital Single Market

**Digital Health and Care**

**Transformation of Health and Care in the Digital Single Market** - Harnessing the potential of data to empower citizens and build a healthier society

**European health challenges**
- Ageing population and chronic diseases putting pressure on health budgets
- Unequal quality and access to healthcare services
- Shortage of health professionals

**Support European Commission:**

1. Secure access and exchange of health data
   - **Ambition:** Citizens securely access their health data and health providers exchange them across the EU
   - **Actions:** eHealth Digital Service Infrastructure will deliver initial cross-border services (patient summaries and prescriptions) and cooperation between participating countries will be strengthened. Progress at a-to-z end scope of eHealth cross-border services to additional cases, e.g., full electronic health records. Recommended exchange format for interoperability of existing electronic health records in Europe.

2. Health data pooled for research and personalised medicine
   - **Ambition:** Shared health resources (data, infrastructure, expertise) allowing targeted and faster research, diagnosis and treatment.
   - **Actions:** Voluntary collaboration mechanisms for health research and clinical practice (starting with “one million genomes by 2022” target). Specifications for secure access and exchange of health data. Pilot actions on rare diseases, infectious diseases and impact data.

3. Digital tools and data for citizen empowerment and person-centred healthcare
   - **Ambition:** Citizens can monitor their health, adapt their lifestyle and interact with their doctors and carers (exchanging and providing feedback).
   - **Actions:** Facilitate supply of innovative digital-based solutions for health, also by SMEs, with common principles and certification. Support demand uptake of innovative digital-based solutions for health, notably by healthcare authorities and providers, with exchange of practices and technical assistance. Mobilise more efficiently public funding for innovative digital-based solutions for health, including EU funding.

**What EU citizens expect...**

- 90% agree To access their own health data (requiring interoperable and quality health data)
- 80% agree To share their health data (if privacy and security are ensured)
- 80% agree To provide feedback on quality of treatments
Population growth has slowed down in recent decades and halted during the COVID-19 pandemic.

The population in rural areas of Europe is already older, on average, than the population in towns, cities and suburbs.

The mobility of young people can result in major changes to demographic structures in particular geographic areas.

Targeted solutions to transform shrinking regions into more dynamic talent-driven locations.

Underrepresented groups may get more opportunities to put their talent to use in the labour market.

To activate more people for the labour market (women, people with disabilities, older people and young people not in education, employment or training).

Enhance labour market integration and facilitate job-to-job transitions.
Lifecycle approach

Growing needs: healthcare, long-term care / mobility, connectivity, well-being

Formative years: life-long learning, healthy & active ageing

Working age: labour markets, productivity, innovation and business opportunities

Retirement: volunteering, intergenerational relations / adequate, fair and sustainable pension systems, old age poverty

Territorial aspects
Broad Priorities in the EU

- Pensions and sustainability of social protection systems
- Long-term care and healthcare
- Healthy and active ageing, including digital tools and skills
- Inclusion and non-discrimination
- Territorial dimension of ageing
Policy focus beyond 2020

From Active and Healthy Ageing to Active and Healthy Living

Focus on:

- Life-course health and wellbeing promotion
- Active ageing at the workplace, Independent living and Integrated care (Digital Europe Program, Horizon Europe)
- Silver economy and support to an EU single market for innovative health solutions for AHA (Innovative Health Initiative)
- Age-friendly environments, cities and communities (New European Bauhaus)
- Implementation practices and deployment (RSCN)
- Capacity building & Digital skills (Twinnings, Digital Europe Program, Horizon Europe, ERDF, Pact for Skills)
- Promote International Cooperation on AHA (International Collaboration, Digital Transformation, Healthy Ageing-IDIH, EU-Japan, EU Canada)
The need for innovative approaches to health service provision

From reactive disease management to proactive, anticipatory care
Active & Healthy Living concept
The new value chain to build on for the Action Plan

**IDENTIFICATION OF HEALTH NEEDS**
- Environmental Context
- Targeted Innovative Solutions

**SECONDARY ACTIVITIES**
- Training
- Digital and Health Empowerment
- Epidemiology

**SUPPORT ACTIVITIES**
- Human Resources Coordination for Services and Monitoring
- Logistics, Spaces, Equipment
- Administration

*SSR, Community, third sector*

**INTEGRATED DIGITAL SYSTEM**
- Medicine, Architecture, Engineering, Veterinary, Agriculture & Food, Human Sciences, Music
- Management, process organization, control and monitoring, economic management
Action Plans

➢ Drafted & updated in the framework of Active and Healthy Living
➢ Identify overarching objectives & activities
➢ Update & valorise results & achievements
➢ Identify supporting tools to collaborative activities
TWGs are pivotal to improve project engagement

- Connect with regional priorities
- Support interdisciplinarity across themes
- Strengthen capacity to respond to funding calls for Thematic Working Groups & RSCN
- Contribute to RSCN Dissemination and Communication Strategy and link to local Dissemination and Communication Plans
- Other (free keywords)
Interactive approach to promote innovation

- Contribution to projects: shared priorities
- Webinars: identify upcoming topics & related timing
- Twinnings opportunities (DHU)
- Joint Publications
- Workshops & conferences (e.g. MetroXraine, AgeingFit, AMEU...)
Contribution of TWG to update the RSCN strategic Objectives 2020 - 2023

Support Members
- Improve communications - website, newsletters, social media
- Develop national and international relationships with relevant organisations, networks, and clusters
- Provide more opportunities for Members to engage with funded projects
- Carry out a Member Survey

Facilitate Knowledge Exchange
- Create Thematic sub-groups to consider / recommend actions to address key health and care issues
- Increase the number of published articles written by RSCN and Members
- Organise webinars on topical issues for regions
- Develop repository of good practices

Facilitate Scaling Up
- Develop and promote Twinning Opportunities
- Facilitate the development of national and geographic networks
- Undertake survey of best practice in Scaling-Up health and care innovation

Support Innovation
- Establish Project Advisory Groups to advise RSCN in its participation on projects
- Increase the number of project proposals submitted by the RSCN and its Members
- Contribute to key actions of the eHealth Stakeholder Group
- Support regions in assessing their readiness for innovation

Management and Governance
